PREFACE

THIS book owes much to the constant help of my wife ; and I should also like to express my gratitude for suggestions and criticism to Dr. F. C. S. Schiller and Mr. A. E. Zimmern, who have read most of it in manuscript.

CONTENTS

CHAPTER I

INTRODUCTION

	PAGE
1. Discontent with our educational system ; the classics as scapegoats ; yet the predominance of classical education in Germany shows that it is consistent with the highest scientific achievement	1
2. Some opinions on the value of classical education as a preparation for a scientific career	5
3. Our real weakness lies in our natural indifference to knowledge	9
4. This due (<i>a</i>) to the insufficiency of our secondary and university education in the past	10
(<i>b</i>) to our university system doing little, in comparison with the German system, to foster the belief in knowledge	13
Object of this book	19

CHAPTER II

PHYSICAL SCIENCE AND THE HUMANITIES

Two views of education criticised ; (<i>a</i>) the ordinary business man's views on a 'practical' education	21
(<i>b</i>) the extreme scientist's view ; Sir Edward Schäfer on science as 'the basis of secondary education' : what physical science can and cannot teach us	26

2. The function of the humanities in education :
 - (a) They are an account of human nature, seen from different sides by literature, history and philosophy. How they assist us to a knowledge of Man
 - (b) They develop flexibility of mind
 - (c) They help us to see the world with imagination
3. This explains their place in education ; physical science, though indispensable, cannot do their work, nor does it give a good general training to the faculties

CHAPTER III

THE CASE FOR THE CLASSICS: GREEK

1. The problem
2. Fallacy of the theory that classical education is a mere accidental survival from the Middle Ages
3. We study Ancient Greece :
 - (a) as containing, with Rome, the history of our origins, and explaining much in our literature, language and ideals
 - (b) for its literature, art and life ; evidence of their value from (a) modern poets, (β) the trenches, (γ) the British Museum, (δ) the effect of Greece on the world at different epochs ; meaning of Greek life to the Renaissance ; its meaning to us ; a modern working man on Greece
 - (c) as a pattern of creative intelligence ; her achievement ; Greek literature full of the key thoughts on which intellectual life depends ; products of creative intelligence working on theology, literature, ethics, science ; fallacy of the idea that Greek thought is antiquated, because the Greeks knew less than we

CONTENTS

ix

	PAGE
4. Two illustrations of the Greek spirit:	
(<i>a</i>) Socrates	106
(<i>b</i>) Hippocrates on epilepsy; his Physician's Oath	115
Summary; Greek literature as the Bible of the world of thought	121

CHAPTER IV

THE CASE FOR LATIN

1. Reasons for position of Latin in education less clear; in spite of a unique power of concise expression, its literature inferior to Greek	123
2. But Rome represents 'character,' and thus supplements the weak side of Greece: her achievement	126
3. Some typical Romans; Cato the Censor; significance and value of these characters	133
4. The Romans appeal to us (<i>a</i>) as more like us; Agricola: (<i>b</i>) as having done a similar work in the world; the interest of Roman history	147

CHAPTER V

SOME EDUCATIONAL ADVANTAGES OF THE CLASSICS

1. Can our own literature replace them?	154
2. Greek and English literature compared	155
3. Disadvantages of educating a nation on its own literature	162
4. Educational advantages of the classics:	
(<i>a</i>) Their completeness	165
(<i>b</i>) Their simplicity	168
(<i>c</i>) Their natural lucidity and directness	170

CONTENTS

	PAGE
5. The use of the classics (<i>a</i>) avoids the disadvantages involved in introducing boys to problems of life and politics through contemporary writers	179
(<i>b</i>) gives independent standards by which to judge ourselves; Hazlitt's views	182
6. Greek as an introduction to modern problems :	
(<i>a</i>) In history : a parallel between fourth century Athens and modern Europe	186
(<i>b</i>) In thought : the Sophists and Plato	191
(<i>c</i>) In politics : Greek criticisms of democracy ; Plato and Aristotle as an introduction to politics ; Aristotle on socialistic theories ; Plato and the problem of industrialism	195

CHAPTER VI

THE CASE FOR GRAMMAR AND PROSE
COMPOSITION

1. How far can the classics be satisfactorily studied in translations?	209
2. Justification of the teaching of Greek and Latin grammar ; their educational value	214
3. Justification of Proses : their value (<i>a</i>) as tests of intellectual ability, (<i>b</i>) as developing concentration of mind, (<i>c</i>) as a training in precision of language : practical uses of this training in life	221
4. This accuracy cannot be learnt from (<i>a</i>) Physical Science or Mathematics, (<i>b</i>) nor, so well, from translation into modern languages	231
5. Summary of the arguments for classical education	235

CHAPTER VII

REFORMS

	PAGE
1. The problem affects three classes :	
(a) The problem of boys in the elementary stages	238
(b) Sixth form boys : present weaknesses in their teaching ; these partly due to emphasis on scholarship in University Scholarship Examinations	244
(c) The Universities : weaknesses of Classical Moderations and University Scholarships at Oxford ; excessive stress on pure scholarship .	248
2. Reforms : (a) reduction of composition in favour of <i>Realien</i> ; (b) intelligent teaching of grammar .	257
3. The fundamental problem is to get good teachers and intelligent teaching. We need (a) to be clearer what we can learn from the classics, (b) to read more methodically and with more intelligence, (c) to regard the classics as living things ; instances of dead teaching	261
4. Compulsory Greek ; a suggestion for solving the problem	271
