

ACKNOWLEDGEMENT

I am extremely grateful to Prof. Vinod K. Sharma an eminent faculty of IIPA New Delhi, and expert in the field of Disaster Risk Reduction, Drought Mitigation and Conservation of Natural Resources, for his immense help and able guidance. He has not only encouraged me to take up this subject for dissertation, but also helped me in locating and lending available literature. He has taken lot of pains to spare his valuable time as and when requested by me to avail his expert knowledge in the field of environment science which he ensured generously, despite his busy schedule, this has enabled me to complete this dissertation. I again express my sincere thanks and regards for his benevolent interactive guidance from inception to completion of this research work.

I express my sincere thanks to eminent faculty and all my well experienced, brilliant fellow participants of 34th Advanced Professional Program in Public Administration, at Indian Institute of Public Administration, who by way of their meaningful interaction have greatly helped in completion of this research work. The guidance, encouragement and motivation received from Sh. Bhartendra Singh Baswan Director; Prof Dolly Arora Program Director; & Prof S.K.Ghosh Program Co-Director, helped in completing this paper and also made this program and pursuit both rewarding and meaningful, I express my gratitude for the same.

I specially thank Sh. R. K. Barik Professor of Public Administration IIPA who has taken keen interest and given his invaluable guidance and suggestions for completion of this research.

The concerned officials of Railway Board and Northern Railway based in New Delhi and Divisional Head quarters rendered great help in providing useful information; detailed insight in problems being faced by Rly, and technical and financial details of various measures already taken and in pipeline regarding various schemes, policies especially in the area of Rain Water Harvesting. They have ensured timely supply of relevant data pertaining to this subject which was essential for completion of this dissertation. My sincere and heartfelt thanks are due to Sh P.D.Sharma Ex.Dir / L&A Rly. Bd., Sh R.G Singh CE/Works /N Rly and Sh. Rajesh Verma Exen /Works /N Rly. to mention a few.

My sincere thanks are also due to all eminent scholars, Organizations whose works have been referred to and used in completion of this research.

(Jitendra kumar)
