

ACKNOWLEDGEMENTS

I hereby wish to thank Dr VK Sharma, my guide and supervisor for this dissertation. No amount of words of gratitude can truly acknowledge the interest taken by him, as he initiated me into this field and helped me build upon my research. With his vast experience and knowledge, he helped me in making my study more focussed and result oriented.

I wish to acknowledge the constant support of the course coordinator at IIPA in pursuing my research. During the field study, my fellow officers from the IAF contributed immensely to my knowledge as they updated me about their respective specialised fields. I am also indebted to all the civil officials and defence personnel who were kind enough to respond to my questionnaire. Their inputs have helped collate an exhaustive list of recommendations in the study.

I wish to thank APPPA office staff and IIPA library staff who have been major contributors in the fructification of this work with their "Support with a smile attitude".

I am indebted to all my family members for their inspiration and support.
