

## ACKNOWLEDGEMENTS

The assessment of the impact of the Japan International Cooperation Agency (JICA) project in Tripura for forest environmental improvement and poverty alleviation has been a very enriching and rewarding experience. I am extremely grateful to Mrs. Asaha Kapur Mehta, the supervisor in this study at the Indian Institute of Public Administration. She encouraged me to work on this topic for its environmental and social relevance, provided guidance and constant support in writing this dissertation.

I am also thankful to the officers and staff of Tripura JICA project in Agartala, particularly Shri G S Raju, CEO of the project, who helped me with critical comments and obtaining all the relevant project documents. I am also thankful to the respondents of the sample JFMCs for their cooperation in giving information about the project, and the field staff of the Forest Department, Government of Tripura, without whose help, this could not have been done.

I express my sincere gratitude to the Programme Directors, Prof. Sushma Yadav and Prof. Sheela Reddy for their encouragement and assistance from time to time. My heartfelt thanks are also due the administrative staff of APPPA office for providing logistic help and support.

I also wish to thank the Department of Personnel and Training for sponsoring my name for this programme.

Last but not the least, I am grateful to my husband, Shri K.S Sethi, himself an avid forester for generating my interest in the subject. His comments on the issue have always catalyzed my thinking on the subject. My heartfelt thanks is due to both my children Arjun and Manini, who extended their full support to me and helped me all the time with the keyboard and the finer nuances of Microsoft Word.
