

TABLE OF CONTENTS

Table of Contents	...	i
Acknowledgements	...	vi
List OF Abbreviations	...	vi
List OF Figures	...	ix
List OF Tables	...	x
Chapter 1 – Introduction	...	1
1.0 Introduction.	...	1
1.1 Statement of the Problem	...	7
1.2 Purpose of Study	...	8
1.3 Research Questions	...	8
1.4 Scope and Limitations	...	8
1.5 Methodology	...	9
1.6 Document Flow	...	9
1.7 Conclusion	...	10
Chapter 2 – Literature Review	...	11
2.0 Introduction	...	11
2.1 Early Strategies to Raise Speed	...	12
2.2 Benefits of High Speed Rail	...	14
2.3 Issues in Raising Speed to 160-200 kmph	...	16
2.3.1 Segregation of Passenger and Freight Traffic	...	16
2.3.2 Lack of Financial Resources	...	17
2.3.3 Over Saturated Trunk Routes	...	20
2.3.4 Rolling Stock for Semi-High Speed	...	21
2.3.5 Organisational Re-structuring	...	24
2.3.6 Under-Recovery of Cost in Passenger Business	...	26
2.3.7 Inadequately Defined Mission and Objectives	...	27
2.3.8 Trespassing on Railway Tracks	...	28
2.3.9 Large Number of Level Crossings	...	29
2.3.10 Monitoring of Weather Conditions	...	31
2.3.11 Automatic Train Protection (ATP) System	...	32
2.3.12 Upgradation of Track Infrastructure	...	34
2.4 Issues in Semi-High Speed Rail	...	36

2.5 Conclusion	...	37
Chapter 3 - Research Methodology and Research Methods	...	38
3.0 Introduction	...	38
3.1 Profile of the Expert	...	39
3.2 Identification and Finalisation of the Barriers	...	41
3.3 Interpretative Structural Modelling (ISM)	...	43
3.3.1 Steps Involved in ISM	...	45
3.3.1.1 Structural Self Interaction Matrix (SSIM)	...	46
3.3.1.2 Reachability Matrix (RM)	...	47
3.3.1.3 Level Partition of Reachability Matrix	...	49
3.3.1.4 MICMAC Analysis	...	49
3.3.1.5 Canonical Matrix	...	50
3.3.1.6 Digraph and ISM Model	...	51
3.3.2 Advantages of ISM	...	51
3.3.3 Limitations of ISM	...	53
3.4 Conclusion	...	53
Chapter 4 – ISM Modelling of Barriers of Semi-High Speed	...	55
4.0 Introduction	...	55
4.1 Discussion on Barriers	...	55
4.1.1 Lack of Financial Resources	...	55
4.1.2 Rigid Organisational Structure	...	56
4.1.3 Inadequately Defined Mission and Objectives	...	57
4.1.4 Over Saturated Trunk routes	...	58
4.1.5 Lack of High Speed Locomotives/Coaches/Train Sets	...	59
4.1.6 Non-upgraded Track and Bridge Infrastructure	...	59
4.1.7 Lack of ATP Based Signalling System	...	60
4.1.8 Lack of Weather Monitoring System	...	60
4.1.9 Lack of Public Awareness Regarding Trespassing/Encroachment on Railway Tracks	...	61
4.1.10 Non-Availability of Automatic Public Announcement System on Stations	...	61
4.1.11 Un-protected Tracks (Large Number of Level Crossings and Non-Fencing of Tracks)	...	62
4.2 Development of ISM Model	...	62
4.2.1 Structured Self-Interaction Matrix of Barriers	...	64
4.2.2 Reachability Matrix of Barriers	...	66

4.2.3	Level Partition of Reachability Matrix	...	69
4.2.4	ISM Model Formulation	...	71
4.3	MICMAC Analysis	...	76
4.4	Discussion on ISM Model of Barriers	...	78
4.5	Conclusion	...	80
	Chapter 5 – Conclusions and Recommendations	...	81
5.0	Introduction	...	81
5.1	Conclusions	...	84
5.2	Recommendations	...	85
5.3	Contribution of the Study	...	86
5.4	Limitations	...	86
5.5	Conclusion	...	87
	References	...	88
	Bibliography	...	92
