

List of Tables

Table 1.1	Annual CO ₂ Emissions Estimates of Top Ten Countries
Table 1.2	India's Sector Wise Emission Levels
Table 1.3	National Missions under the National Action Plan on Climate Change
Table 1.4	Overview of existing, emerging and potential emission trading schemes
Table 4.1	Transaction Costs
Table 4.2	Top three Industrial Sectors in GHG Emission
Table 4.3	Estimates of Extent of Land Degradation in India
Table 4.4	Average Carbon Sequestration Rate Agroforestry for different Regions (average values for above ground woody biomass only)
Table 4.5	Estimate of Potential of Generating Carbon Credits from Agroforestry in India
Table 4.3	Economics of two Agroforestry Models with and without Carbon Credit Benefits
Table 4.4	Cost Benefit Ratio with different price of carbon credit
Table 4.5	Impact of Transaction Cost on BC Ratio (a) Poplar with Wheat and Paddy (b) Khejri with Millet
Table 4.7	Additional Gain from Carbon Credits over Agroforestry for different Carbon Prices and Transaction Cost combinations

List of Figures

- Fig 1.1 Projection of GHG emission from India
- Fig 1.2 Path way for the Carbon Market
- Fig 3.1 Carbon cycle through main global carbon stocks
- Fig 3.2 Illustration of Baseline and Additionality
- Fig 4.1 Supply Demand Curve showing negative externality
- Fig 4.2 Concept of Pigovian Tax
- Fig 4.3 Explaining Transaction Cost
- Fig 4.4 Impact of high transaction cost on small holder
- Fig 4.5 Abatement, Transaction Cost and Carbon Credits
- Fig 4.6 Schematic diagram showing concept of domestic carbon market
- Fig 4.7 Concept of Payment of Ecosystem Services
- Fig 4.8 Poplar with Wheat
- Fig 4.9 Poplar with Turmeric
- Fig 4.10 Khejri with Millet
- Fig 4.11 Poplar with Sunflower
- Fig 5.1 Schematic diagram showing elements of Policy Framework
