

List of Tables

1. A comparison of per capita GHG emissions of some other countries
2. Electricity Consumption Per Capita(KWh)
3. Comparison of Emissions Intensities among Countries
4. Ethical criteria for Entitlement Policy
5. Apportionment for Emission Reduction to current levels by 2030
6. Apportionment of Emission Reduction to 10% less than current levels by 2040
7. Apportionment of Emission Reduction to 20% less than current levels by 2050
8. Apportionment of Emission Reduction to limit temperature rise to 2 °C by 2050
9. Apportionment of Emission Reduction to limit temperature rise to 2.5 °C by 2050
10. Comparison of Apportionment Approaches

List of Annexure

1. Greenhouse gases and Global Warming
2. Data Tables
