ACKNOWLEDGEMENT

This dissertation is a milestone in my academic career. I have been fortunate to learn theories and concepts which would have been impossible if I had not extensively carried out the needed research. I am grateful to a number of people who have guided and supported me throughout the research process and provided assistance for my venture.

I would first like to thank my advisor, Dr. Shyamli Singh who guided me in selecting the final theme for this research. My advisor was there throughout my preparation of the proposal and the conceptualization of its structure. I would not have been able to do the research and achieve learning in the same manner without her help and support. Her recommendations and instructions have enabled me to assemble and finish the dissertation effectively. I am grateful to Prof. Pranab Banerji and Prof. Rakesh Gupta co-program director, both of whom always supported me with lots of encouragements.

I am very much indebted to my family, my son Ashish Kumar and my wife Jayshree Kumari, who supported me in every possible way to see the completion of this work.

My sincere thanks goes to my daughter Amrita Kumari who served as my de-facto computer teacher and time keeper in ensuring that I don't fall behind time in preparation of a good document.

I also express my gratitude to my colleagues especially Sandeep Swaroop, Scientist CGWB and my course mates who were a constant source of inspiration to me. My sincere thanks are also due to the faculty members, staff of APPPA secretariat and library staff of IIPA for helping me in various ways to complete the work.

(RAJEEV KUMAR)
